I am a Hydro customer and I would like to know when these rate increases will stop. The average homeowner is unable to live comfortably as the bills keep climbing. I can assure you that my salary has not climbed anywhere near enough to cover all these costs. It's not bad enough that we have to chose between doing laundry and running the air conditioner but my property value has decreased as only a moron would chose to move into a Hydro one serviced home. I strongly advise that the decision to raise rates be refused as the average person cannot continue to live under these conditions. Moving out of province will be our only option soon.
