...I am in receipt of this rate hike ... I would like to know if I (my household of two) use LESS than your benchmark 750 kWh per month (I average 535 kWh / month)... will the rate decrease starting in 2018 and be affected proportionately ... Overall while I am happy with the idea that when I switch a light switch on and the lights do actually come on I must tell you that INCREASES such as these are not what I want to see... I am retired, am a cancer survivor and am on a fixed income ... please consider that I appreciate the 50% increase in your OESP but any counter increases in rates are troublesome.

Sincerely,
Paul Wodehouse
