I'm tired of your constant increases and we were suppose to get relief from our high energy costs. Why do you allow them to keep increasing rates? How about we start with how much everyone gets paid at hydro one? I saw a lot of employees of hydro one on the sunshine list this year including shift leaders and a janitor. Why? Maybe if we stoped letting them increase rates maybe they would have to cut costs like every other company. Stop letting them raise rates. Personally I would love to have an electric vehicle I know that is what the province would like too being how much extra electricity they produce, but I can't bet on how much the rates will be in five years or even one year because raising them until you get some stability and predictability of costs, no one wants to invest in electricity grater then they are already using. You need to understand that because you are undercutting the future market with these increases. Stop! No more increases !!??
