-- Comments --

I have lived at the above address for almost 17 years. My hydro has more then doubled since I have been here and that is with using more energy star rated appliances etc.. which means that I should have seen a decrease in my hydro bill but yet it continues to increase. It is making very difficult for an average family to manage and to continue to increase the rate over the next 4 years will only make it next to impossible for a family to survive.
