I am not usually a letter writing person. However this outrages me. Under the current rates there are thousand of people who are already having to choose between eating, paying houses costs, or paying their hydro bills. And Hydro wants to increase rates again! Even with the boost in min wage in Ontario, many will still have to make the choice of what bills to skip in order to have heat during cold Ontario winters. Mean while Hydro is able to pay their top executives, millions in bonuses every year. This can not continue, working class deserve heat just as much as some one with a high income.
