I am extremely concerned about this application to increase the delivery charges for our region, not just this year, but for the next 5 years. I recognize we are considered a rural area, although we are only 20 minutes from Peterborough. I also recognize that maintenance of the lines is critical the electricity infrastructure. However, delivery charges already represent the most significant portion of my monthly hydro bill. There are months when my electricity usage is very low, but my delivery charges remain in the \$60 to \$70 range. Despite these costs, I still am required to maintain a generator as several times over the past 12 months we have lost electricity.

I go on record as opposing this rate increase.
