Hydro One is driving business and it's citizens out of Ontario as it is. A rate increase will put the last nail in the coffin for most. Why does a CEO need to earn over 4 million a year? Hydro One workers received wage increases yet the people paying their wages are losing their houses due to the cost of hydro. This province is making absolutely no sense to me.

That's why I now live in Edmonton, AB. Still own my home in Ontario but it's up for sale. I will never return to the 250 thousand rules and regulations and hydro costs. I was not eating when I lived there. I can now pay for my house back there and rent a house here, as well as have a successful business to which I pay almost 2 thousand a month lease to operate. Yes, I am paying 5 times the amount in expenses in Alberta yet I am eating and eating well.

Wonder why??? I read people's stories from Ontario on a daily basis. Many are looking to other provinces to live. Have fun trying to deliver your high cost hydro to no one. Where will that leave Ontario?
