Dear Sir/Mam,

I am writing this in regard to the proposed energy cost increase from hydro one. Ontarios hydro rates are already the highest in the country. As it stands right now, our hydro bill averages around \$250 per month for a modest 3 bedroom home. This amount is where we end up even though we conserve as much energy as we can. We turn all lights off that are not necessary, only run our dishwasher at night and only do laundry on the weekend. It is getting to the point where if the rates continue to climb, we will be in the same position as a lot of others and having to choose between power and other essentials like food or fuel. Please, don't let hydro one gouge us even more.

Sincerely,
A cash strapped Ontario citizen
