Hydro One Networks Inc.
EB-2017-0049
re: Hydro One's application to the Ontario Energy Board (OEB) for a distribution rate increase.

Objection

Until the Government of Ontario is able to put forward to the people of this province a clear and concise plan for the production, distribution and cost of Hydro, I cannot support this application, and I my instruction to you would be that you do not either.

There are many other jurisdictions in Canada, throughout the world generally, and in particular some of the European models for power supply that can provide our government with the guidance it clearly needs regarding all aspects of Hydro supply, production and cost management.

The current model is unsustainable and unfair to the residents and businesses of this province, both now and for the future, and unbecoming of a Liberal government.

Hydro One Networks Inc is also seeking a myriad of increases for various of its other activities, which are not clearly explained, if explained at all.

Such increases must not be allowed, pending the people of this province being provided with clear and concise justification for such increases, on a per item basis.

David Adams
