Dear Ontario Energy Board,
I am writing to challenge Hydro One's application request for a distribution rate increase, and to have the service charges on disconnection/reconnections, removal of load limiters, account collections and access to their poles all increased.
My family and I work hard to keep our electricity usage below 400kWh per month, and to be honest our electricity use is not the most expensive portion of our bill. The most expense to us is the delivery of our electricity, in fact the cost of delivery is more than 50% of our bill (\$50 on a \$94 bill in May)!

I challenge this application which would see my rates for delivery rise, and I object to the application request that would see these increases be added to my bill before any rebates from the Fair Hydro Act, 2017 are implemented.

Please help alleviate further burden to Ontario consumers of Hydro One by denying it's application for rate increases.

Sincerely,

Tobi Maniacco
