1 INTRODUCTION AND SUMMARY

Rideau St. Lawrence Distribution Inc. (Rideau St. Lawrence Distribution) filed an application with the Ontario Energy Board (OEB) to change its electricity distribution rates effective May 1, 2016 (the Application). Under section 78 of the *Ontario Energy Board Act, 1998* (OEB Act), a distributor must apply to the OEB to change the rates it charges its customers.

Rideau St. Lawrence Distribution provides electricity distribution services to approximately 5,960 customers in the Town of Prescott, Village of Westport, Township of Cardinal, and Municipality of South Dundas.

The OEB's policy for rate setting is set out in a report of the OEB entitled "Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach" (RRFE). The RRFE provides the distributor with performance-based rate application options that support the cost-effective planning and efficient operation of a distribution network. This framework provides an appropriate alignment between a sustainable, financially viable electricity sector and the expectations of customers for reliable service at a reasonable price.

Rideau St. Lawrence Distribution asked the OEB to approve its rates for five years using the RRFE Price-Cap Incentive rate-setting option. With an approved base year, Rideau St. Lawrence Distribution can apply annually to adjust its distribution rates in each of the next four years using the RRFE Price-Cap Incentive rate-setting option. The approved 2016 rates are adjusted mechanistically annually based on inflation and the OEB's assessment of Rideau St. Lawrence Distribution's efficiency.

A settlement conference was held on April 24, 2017 which was attended by Rideau St. Lawrence Distribution and the OEB-approved intervenors in this proceeding; namely, the School Energy Coalition (SEC) and the Vulnerable Energy Consumers Coalition (VECC) (collectively, the parties). The parties resolved all of the issues associated with the Application and filed a Settlement Proposal with the OEB on May 11, 2017.

The Settlement Proposal sets the 2016 base revenue requirement at \$2,592,434, which is a \$146,807 reduction from the originally applied for amount of \$2,739,241. It also reduces the grossed up revenue deficiency from \$320,747 to \$189,803. In the Settlement Proposal, the parties acknowledge that the level of planned capital expenditures and the rationale for planning and pacing choices are appropriate to

maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system¹.

The Settlement Proposal reduces the total bill for a typical residential customer with monthly consumption of 750 kWh, by about \$1.98 per month before taxes - a percentage decrease of 1.59% from the current approved rates. The distribution portion of the bill increases by \$2.45, 10.03% higher than current approved rates.

The OEB approves the Settlement Proposal and the resulting rates.

The OEB finds that the outcomes of the Settlement Proposal result in just and reasonable rates and are compatible with the operational effectiveness and other performance objectives of the RRFE.²

² Report of the Board: Renewed Regulatory Framework for Electricity Distributors: A Performance Based Approach, October 18, 2012

2 THE PROCESS

The OEB expects applicants applying for May 1, 2016 rates to have filed their application by end of August of the previous year. Rideau St. Lawrence Distribution filed a letter to the OEB that despite its best efforts it was unable to meet the August deadline and subsequently filed an application on October 21, 2016 for 2016 rates. The OEB issued a Notice of Application on January 3, 2017, inviting parties to apply for intervenor status. SEC and VECC applied for, and were granted, intervenor status and cost eligibility. OEB staff also participated in this proceeding.

A community meeting was held January 16, 2017 in Prescott, Ontario, where the OEB staff and Rideau St. Lawrence Distribution made presentations to customers describing the rate setting process and the Application. Customers were given the opportunity to ask questions and provide comments, which were summarized and recorded as part of the proceeding. These comments were taken into consideration during the evaluation of the Application by the OEB.

The OEB issued Procedural Order No.1 on February 2, 2017. This order established, among other things, the timetable for a written interrogatory discovery process and a settlement conference. On March 8, 2017, Rideau St. Lawrence Distribution filed a letter indicating that it could not meet the interrogatory deadline and therefore was requesting an extension. The OEB granted the extension and issued Procedural Order No.2 to revise the timetable for all subsequent procedures. Rideau St. Lawrence Distribution responded to interrogatories and follow-up questions submitted by OEB staff and the intervenors. The OEB issued its approved Issues List on April 10, 2017.

The settlement conference took place on April 24, 2017 and, upon having reached an agreement on all of the items on the Issues List, Rideau St. Lawrence Distribution and the intervenors filed a Settlement Proposal with the OEB on May 11, 2017 (see Schedule A attached).

3 DECISION ON THE ISSUES

3.1 Settlement Proposal

The Settlement Proposal addressed all elements of the OEB's approved Issues List for this proceeding, and represented the parties' full settlement of all the issues. OEB staff filed a submission on May 18, 2017, in support of the Settlement Proposal. The submission contained further explanation and rationale on specific issues for the OEB to consider.

Through the settlement process, the parties agreed to certain reductions to Rideau St. Lawrence Distribution's proposed capital expenditures and operating, maintenance and administrative costs.

Findings

The OEB approves the Settlement Proposal (see Schedule A attached) and the associated cost consequences.

The OEB finds that the Settlement Proposal benefits consumers and produces outcomes that are consistent with the operational effectiveness and other performance objectives of the RRFE.

3.2 Test Year

The Application was filed on October 21, 2016 pursuant to the *Filing Requirements for Electricity Distribution Rate Applications - 2015 Edition for 2016 Rate Applications* (filing requirements). Given that the Application was filed after the OEB's August 2015 deadline for 2016 rates' applications, the OEB received the application as a "late filing". However, unlike with the OEB's current edition of the filing requirements, the 2015 edition (for 2016 rates) did not require a late filing applicant to convert its application to the subsequent year. (Under the 2016 edition of the filing requirements (for 2017 rates) this conversion would now be required.)

Through the Settlement Proposal, the parties requested that the OEB approve a 2016 test year with the resulting rates effective in 2017.

The parties to the settlement agreed that it was appropriate to use 2016 as a test year. The Settlement Proposal indicated that despite the late filing, the OEB did not require Rideau St. Lawrence Distribution to revise or amend its Application. As well,

comprehensive forecasts for a 2017 test year had not been filed. OEB staff submitted that a 2016 test year would be acceptable as it would be consistent with the edition of the filing requirements applicable to the Application.

Findings

The OEB finds that it is appropriate to use 2016 as the test year with rates effective in 2017 in this case.

3.3 Effective Date for 2016 Rates and Rebasing Rates

The parties agreed that the effective date for 2016 rates should be the earliest date that Rideau St. Lawrence Distribution can implement the OEB's Decision and Rate Order. Given that the Settlement Proposal was filed on May 11, 2017, it implied an effective date in Rideau St. Lawrence Distribution's 2017 rate year which began on May 1, 2017. The Settlement Proposal does not address whether Rideau St. Lawrence Distribution rebased rates for 2017 or for 2016. The year for rebasing rates is important as it will determine the expected timing of Rideau St. Lawrence Distribution's next cost of service and IRM applications.

OEB staff submitted that Rideau St. Lawrence Distribution should file its next cost of service application five years from 2016, for 2021 rates.

OEB staff also submitted that Rideau St. Lawrence Distribution should have reasonably expected its 2016 rates to be implemented in 2017 and that no other adjustment would be made for 2017. On this basis, OEB staff submitted that Rideau St. Lawrence Distribution's next IRM application should be for May 1, 2018 rates.

Findings

The OEB approves a July 1, 2017 effective date for rates, consistent with the approved Settlement Proposal. The OEB finds that Rideau St. Lawrence Distribution's rates have been rebased for 2016 and its next cost of service application should be filed for 2021 rates. The OEB finds that Rideau St. Lawrence Distribution should file its next IRM application for May 1, 2018 rates as this Decision and Order is issued in the 2017 rate year.

4 IMPLEMENTATION

The new rates approved in this Decision and Rate Order are to be effective and implemented on July 1, 2017. Consistent with the Settlement Proposal, this is the earliest date Rideau St. Lawrence Distribution can implement the OEB's Decision and Rate Order. With the Settlement Proposal, Rideau St. Lawrence Distribution included tariff sheets and detailed supporting material, including all relevant calculations showing the impact of the implementation of the settlement on its approved revenue requirement, the allocation of the revenue requirement to its rate classes and the determination of the final rates and rate riders, including bill impacts.

The OEB made some changes to the wording of the tariff sheets attached to the Settlement Proposal in order to ensure consistency with the tariff sheets of other Ontario electricity distributors. The final approved Tariffs of Rates and Charges are attached as Schedule B to this Decision and Rate Order.

SEC and VECC are eligible for cost awards in this proceeding. The OEB has made provision in this Decision and Rate Order for SEC and VECC to file their cost claims. The OEB will issue its cost award decision after the following steps are completed.

5 ORDER

THE ONTARIO ENERGY BOARD ORDERS THAT:

- 1. The Tariff of Rates and Charges set out in Schedule B of this Decision and Rate Order are approved effective July 1, 2017, and will apply to electricity consumed, or estimated to have been consumed, on and after July 1, 2017. Rideau St. Lawrence Distribution Inc. shall notify its customers of the rate changes no later than the delivery of the first bill reflecting the new rates.
- 2. The School Energy Coalition and the Vulnerable Energy Consumers Coalition shall submit their cost claims no later than June 22, 2017.
- 3. Rideau St. Lawrence Distribution Inc. shall file with the OEB and forward to the School Energy Coalition and the Vulnerable Energy Consumers Coalition any objections to the claimed costs no later than June 29, 2017.
- 4. The School Energy Coalition and the Vulnerable Energy Consumers Coalition shall file with the OEB and forward to Rideau St. Lawrence Distribution Inc. any responses to any objections for cost claims no later than July 7, 2017.
- 5. Rideau St. Lawrence Distribution Inc. shall pay the OEB's costs incidental to this proceeding upon receipt of the OEB's invoice.

DATED at Toronto June 15, 2017

ONTARIO ENERGY BOARD

Kirsten Walli Board Secretary

SCHEDULE A: SETTLEMENT PROPOSAL DECISION AND RATE ORDER RIDEAU ST. LAWRENCE DISTRIBUTION INC. EB-2015-0100 JUNE 15, 2017

May 11, 2017

Ms. Kirsten Walli Board Secretary Ontario Energy Board PO Box 2319 2300 Yonge St, 27th Floor Toronto, ON M4P 1E4

Dear Ms. Walli,

Rideau St. Lawrence Distribution Inc. EB-2015-0100 – 2016 Distribution Rates Application Settlement Proposal

Please be advised that the Parties in this matter have reached a complete settlement. Pursuant to Procedural Order No. 2, please find attached the settlement proposal in this matter as well as supporting documentation.

Pursuant to Procedural Order No. 2, The OEB set a tentative date of May 30, 2017 for Rideau St. Lawrence Distribution Inc. ("RSL") to present to the OEB any settlement proposal and a summary of any unsettled issues in the case. In view of the complete settlement of the parties attached, and in the interests of efficiency, RSL respectfully requests that the Board reconsider the need for an oral presentation.

An electronic copy has been filed using the OEB's E-filing service.

Yours truly,

John Walsh

President & CEO

Rideau St. Lawrence Distribution Inc.

EB-2015-0100

Settlement Proposal

Filed with OEB: May 11, 2017

Rideau St. Lawrence Distribution Inc. (the "Applicant" or "RSL") filed a complete cost of service application with the Ontario Energy Board (the "OEB") on October 21, 2016 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that RSL charges for electricity distribution and other charges for 2016, with such rates and charges to be effective January 1, 2017 (OEB Docket Number EB-2015-0100) (the "Application").

The OEB issued and published a Notice of Hearing dated January 3, 2017, and Procedural Order No. 1 on February 2, 2017, the latter of which required the Parties to the proceeding to develop a draft issues list and scheduled a Settlement Conference.

On March 9, 2017, the OEB granted RSL's request to extend the interrogatory response filing deadline until March 24, 2017 and the OEB cancelled all other dates in Procedural Order No. 1. RSL filed its interrogatory responses with the OEB on March 24, 2017.

On March 28, 2017, the OEB issued Procedural Order No. 2 which made provision for the filing of a draft issues list by Ontario Energy Board staff ("OEB staff") and for a settlement conference to be convened starting on April 24, 2017. On April 5, 2017, OEB staff submitted a proposed issues list that was agreed to by the Parties. On April 10, 2017, the OEB issued its decision on the proposed issues list, approving the list submitted by OEB staff (the "Issues List"). This Settlement Proposal is filed with the OEB in connection with the Application and is organized in accordance with the Issues List.

Further to the OEB's Procedural Order No. 2, a settlement conference was convened on April 24, 2017, in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's *Practice Direction on Settlement Conferences* (the "Practice Direction").

Karen Wianecki acted as facilitator for the settlement conference which lasted for one day.

RSL and the following intervenors (the "Intervenors"), participated in the settlement conference:

School Energy Coalition ("SEC"); and Vulnerable Energy Consumers Coalition ("VECC").

RSL and the Intervenors are collectively referred to herein as the "Parties".

OEB staff also participated in the settlement conference. The role adopted by OEB staff is set out in page 5 of the Practice Direction. Although OEB staff is not a party to this Settlement Proposal, as noted in the Practice Direction, OEB staff who did participate in the settlement conference are bound by the same confidentiality requirements that apply to the Parties to the proceeding.

This document is called a "Settlement Proposal" because it is a proposal by the Parties to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB's approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

The Parties acknowledge that this settlement proceeding is confidential in accordance with the Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings, and the rules of that latter document do not apply. Instead, in this settlement conference, and in this Agreement, the Parties have interpreted "confidential" to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the settlement conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the settlement conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the settlement conference but were a) any persons or entities that the Parties engage to assist them with the settlement conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include (a) additional information included by the Parties in this Settlement Proposal, and (b) the Appendices to this document. The supporting Parties for each settled and partially settled issue, as applicable, agree that the evidence in respect of that settled or partially settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal.

There are Appendices to this Settlement Proposal which provide further support for the proposed settlement. The Parties acknowledge that the Appendices were prepared by RSL. While the Intervenors have reviewed the Appendices, the Intervenors are relying on the accuracy of the underlying evidence in entering into this Settlement Proposal.

In the tables, figures shall be deemed to be in dollars, unless otherwise characterized (i.e. kW, %, etc).

Outlined below are the final positions of the Parties following the settlement conference. For ease of reference, this Settlement Proposal follows the format of the final approved issues list for the Application attached to the Issues List Decision dated April 10, 2017.

The Parties are pleased to advise the OEB that they have reached a complete agreement with respect to the settlement of all of the issues in this proceeding. Specifically:

"Complete Settlement" means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted by the OEB, the Parties will not adduce any evidence or argument during the oral hearing in respect of these issues.	# issues settled:
"Partial Settlement" means an issue for which there is partial settlement, as RSL and the Intervenors who take any position on the issue were able to agree on some, but not all, aspects of the particular issue. If this Settlement Proposal is accepted by the OEB, the Parties who take any position on the issue will only adduce evidence and argument during the hearing on those portions of the issues not addressed in this Settlement Proposal.	# issues partially settled: None
"No Settlement" means an issue for which no settlement was reached. RSL and the Intervenors who take a position on the issue will adduce evidence and/or argument at the hearing on the issue.	# issues not settled: None

According to the Practice Direction (p. 3), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties who took on a position on a particular issue must agree with any revised Settlement Proposal as it relates to that issue prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not RSL is a party to such proceeding. For greater certainty, the Parties take no position in this

Rideau St. Lawrence Distribution Inc. EB-2015-0100 Settlement Proposal

proceeding on whether or not RSL may bring a 2017 IRM application and this settlement is without prejudice of the rights of the Parties to take any position in respect of any such application.

Where in this Agreement, the Parties "Accept" the evidence of RSL, or the Parties or any of them "agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

SUMMARY

In reaching this complete settlement, the Parties have been guided by the Filing Requirements for 2016 rates, the approved issues list attached as Schedule A to the OEB's Issues List Decision of April 10, 2017, and the Report of the OEB titled *Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach* dated October 18, 2012 ("RRFE").

The application for rates was filed on October 21, 2016. It was filed on the basis of the Board's guidelines for 2016 Cost of Service Application (filing date of August 2015). As part of the interrogatory process, RSL provided unaudited 2016 results. As a result, the Application was reviewed, with the exception of cost of capital, largely on a historical test year basis. The disposition of Deferral and Variance Accounts was based on 2015 audited actual amounts, with interest included to April 30, 2016.

This Settlement Proposal reflects a complete settlement of the issues in this proceeding.

RSL has made changes to the Revenue Requirement as depicted below in Table A.

Table A: Revenue Requirement Summary

	Application	Interrogatories	Variance	Settlement	Variance
Regulated Return On Capital	395,941	377,655	- 18,286	362,633	- 15,022
Regulated Rate of Return	5.62%	5.46%	-0.16%	5.26%	-0.20%
Rate Base	7,040,705	6,911,703	- 129,002	6,891,027	- 20,676
Working Capital Base	17,237,692	17,137,528	- 100,164	16,861,844	- 275,684
Working Capital Allowance	1,292,827	1,285,315	- 7,512	1,264,638	- 20,677
OM&A Expenses	2,182,787	2,172,824	- 9,963	2,092,824	- 80,000
Amortization Expense	389,439	365,942	- 23,497	365,942	-
Property Taxes	18,400	18,187	- 213	18,187	-
Grossed up PILs	20,245	23,231	2,986	23,102	- 129
Service Revenue Requirement	3,006,812	2,957,839	- 48,973	2,862,688	- 95,151
Less: Revenue Offsets -	267,572	- 270,254	- 2,682	- 270,254	-
Base Revenue Requirement	2,739,240	2,687,585	- 51,655	2,592,434	- 95,151
Revenue Deficiency	320,747	274,205	- 46,542	189,804	- 84,401

The Bill Impacts as a result of this settlement agreement is summarized in Table B.

Table B: Summary of Bill Impacts

			2016	2017		Total Bill	Distribution
Customer Class	kWh	kW	Bill	Bill	Variance	Impact	Bill Impact
Residential	750		153.74	151.53	- 2.21	-1.44%	-3.95%
Residential (10th Percentile)	304		71.88	74.03	2.15	3.00%	9.29%
General Service Less Than 50 kW	2,000		401.86	395.65	- 6.21	-1.55%	-5.52%
General Service 50 to 4,999 kW	147,135	297	25,870.43	26,285.21	414.78	1.60%	28.39%
Street Lighting	22,825	62	7,704.85	7,601.59	- 103.26	-1.34%	-2.57%
Sentinel Lighting	294	1	73.85	77.12	3.27	4.43%	12.82%
Unmetered Scattered Load	727		145.38	142.19	- 3.19	-2.19%	-8.69%

As shown in Table B, the total bill impacts for all classes are less than 10%. As a result, and consistent with the OEB's policy, no proposals for rate mitigation are necessary.

Table C: Summary of Cost Benchmarking Results

Rideau St. Lawrence Distri	bution Inc.	
	2015	2016
	(History)	(Test Year)
Cost Benchmarking Summary		
Actual Total Cost	3,208,656	3,222,872
Predicted Total Cost	3,366,153	3,430,649
Difference	(157,497)	(207,777
Percentage Difference (Cost Performance)	-4.8%	-6.2%
Two-Year Average Performance		-5.5%
Stretch Factor Cohort		
Annual Result	3	3
Two Year Average		3

The increase in benchmarking efficiency from 2015 to 2016 represents a productivity improvement from 4.8% below predicted costs in 2015 to 6.2% below predicted costs in 2016 (the test year) and reflects RSL's commitment to continuous improvement.

The Parties believe that, since there are no areas of disagreement among the Parties, no oral hearing is required if this Settlement Proposal is accepted.

Based on the foregoing, and the evidence and rationale provided below, the Parties agree that this Settlement Proposal is appropriate and recommend its acceptance by the OEB. Please refer to Appendix A for the schedule of draft tariffs resulting if this settlement is accepted by the OEB.

1. Planning

1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:

- *customer feedback and preferences;*
- productivity;
- compatibility with historical expenditures;
- compatibility with applicable benchmarks;
- reliability and service quality;
- *impact on distribution rates;*
- trade-offs with OM&A spending;
- government-mandated obligations; and
- the objectives of Rideau St. Lawrence Distribution and its customers

Complete Settlement: For the purposes of the settlement of all of the issues in this proceeding, all the Parties agree to RSL's 2016 actual rate base and actual in-service additions for rate setting purposes.

With the above agreement, and for the purposes of settlement of all the issues in this proceeding, the Parties accept that the level of 2016 in-service additions and the rationale for planning and pacing choices are appropriate and adequately explained, giving due consideration to:

- The customer feedback and preferences as more fully detailed in Exhibit 1, Tab 3, Schedule 1; Exhibit 2, Tab 5, Schedule 1; Appendix 2.1, Section 2.3.1.3; and 1-Staff-7; 1-Staff-8;
- The past and planned productivity initiatives of RSL as more fully detailed in Exhibit 2, Tab 5, Schedule 1; Appendix 2.1, Section 2.2 and 2.3.1; and 1-SEC-6.
- RSL's benchmarking performance as more fully detailed in Exhibit 1, Tab 10, Schedule 1; 1-SEC-4 and 1-SEC-7; and in Table C in this settlement agreement;
- RSL's past reliability and service quality performance as well as RSL's targets for performance in the test year as more fully detailed in Exhibit 2, Tab 5, Schedule 8; Table 2.23; Appendix 2.1, Sections 2.3 and 2.3.1.4; and 2-Staff-15;
- The total impact on distribution rates, as more fully detailed in Table B in this settlement agreement;
- The settlement on OM&A as described under issue 1.2 of this Settlement Proposal;

- RSL's performance meeting government mandated obligations as more fully detailed in Exhibit 1, Tab 1, Schedule 1; and Exhibit 1, Tab 10, Schedule 1;
- RSL's targets and objectives as more fully detailed in Exhibit 1, Tab 1, Section 1; Exhibit 1, Tab 2, Schedule 2; and Appendix 2.1, Executive Summary.

The Parties further agree that the Distribution System Plan filed in this proceeding, combined with the resources made available to RSL in the Test Year under the terms of this Settlement Proposal, provide a foundation to RSL in the Test Year to continue to: (a) pursue continuous improvement in productivity; (b) maintain system reliability and service quality; and (c) maintain reliable and safe operation of its distribution system.

RSL appears to have an unusually high number of planned outages and scheduled outages. RSL agrees that, prior to its next cost of service rebasing application, it will carry out an assessment of the underlying causes of its level of planned outages and scheduled outages and will file that assessment together with RSL's recommendations as part of RSL's next cost of service rebasing application.

Appendix B of this Settlement Proposal provides an updated Appendix 2-AB to reflect this settlement. Appendix C of this Settlement Proposal provides the agreed to Appendix 2-BA 2016 Fixed Asset Continuity Schedule to reflect this settlement.

Evidence:

Application: Exhibit 1, Tab 1, Schedule 1, Exhibit 1, Tab 2, Schedule 2, Exhibit 1, Tab 2, Schedule 4; Exhibit 1, Tab 10, Schedule 1, and Exhibit 2 in its entirety.

1.2 OM&A

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

- customer feedback and preferences;
- productivity;
- compatibility with historical expenditures;
- compatibility with applicable benchmarks;
- reliability and service quality;
- impact on distribution rates;
- trade-offs with capital spending;
- government-mandated obligations; and
- the objectives of Rideau St. Lawrence Distribution and its customers.

Complete Settlement: RSL agrees to reduce its proposed OM&A expenses in the test year by \$80,000. The reduction results in a proposed OM&A amount that is less than the actual 2016 expenditures, which aligns with RSL's objective of continuous improvement.

Based on the foregoing and the evidence filed by RSL, the Parties agree that the level of the agreed upon OM&A expenditures and the rationale for planning and pacing choices are appropriate and adequately explained, giving due consideration to:

- RSL's actual OM&A expenditures in 2016.
- The customer feedback and preferences as more fully detailed in Exhibit 1, Tab 3, Schedule 1; Exhibit 2, Tab 5, Schedule 1; Appendix 2.1, Section 2.3.1.3; and 1-Staff-7; 1-Staff-8;
- The past and planned productivity initiatives of RSL as more fully detailed in Exhibit 2, Tab 5, Schedule 1; Appendix 2.1, Section 2.2 and 2.3.1; and 1-SEC-6.
- RSL's benchmarking performance as more fully detailed in Exhibit 1, Tab 10, Schedule 1; 1-SEC-4 and 1-SEC-7; and in Table C in this settlement agreement;
- RSL's past reliability and service quality performance as well as RSL's targets for performance in the test year as more fully detailed in Exhibit 2, Tab 5, Schedule 8; Table 2.23; Appendix 2.1, Sections 2.3 and 2.3.1.4; and 2-Staff-15;
- The total impact on distribution rates, as more fully detailed in Table B in this settlement agreement;
- The changes in capital spending as described under Issue 1.1 of this Settlement Proposal;
- RSL's performance meeting government mandated obligations as more fully detailed in Exhibit 1, Tab 1, Schedule 1; and Exhibit 1, Tab 10, Schedule 1;

• RSL's targets and objectives as more fully detailed in Exhibit 1, Tab 1, Section 1; Exhibit 1, Tab 2, Schedule 2; and Appendix 2.1, Executive Summary.

2. Revenue Requirement

2.1 Are all elements of the Revenue Requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

Complete Settlement: The Parties agree that all elements of the Revenue Requirement have been correctly determined in accordance with OEB policies and practices. Specifically:

- a) *Rate Base:* The Parties agree that the rate base calculations, as updated to reflect this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- b) Working Capital: The Parties agree that the working capital calculations, as updated to reflect this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- c) Cost of Capital: For the purpose of settlement, RSL has agreed to update its cost of capital calculations using the Board's deemed debt rate of 3.72% for the costs of two affiliate promissory notes. The Parties agree that the cost of capital calculations, as updated to reflect this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- d) *Other Revenue:* The Parties agree that the other revenue calculations are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- e) *Depreciation:* The Parties agree that the depreciation calculations, as updated to reflect this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- f) *Taxes:* The Parties agree that the PILs calculations, as updated to reflect this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices. The PILs workform reflecting this Settlement Proposal is provided as part of the supporting material in file named RSL_2016_Income_Tax_Workform_Settlement_20170504.

2.2 Has the Revenue Requirement been accurately determined based on these elements?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties agree that the proposed Revenue Requirement has been accurately determined in the Appendices.

The elements of Revenue Requirement are detailed in Tables 2.2A to 2.2H below.

Table 2.2A Revenue Requirement

2.3 Is it appropriate to use 2016 as the test year when rates are effective June 1, 2017?

Complete Settlement: The Application was filed based on the OEB's 2015 Filing Requirements for 2016 rate setting. The Application was filed on October 21, 2016. The OEB did not require RSL to revise or amend its Application.

For the purposes of settling all of the issues in this proceeding, the Parties agree that it is appropriate to use 2016 as the test year. The Application, the Interrogatory Responses, and this Settlement Proposal are all based on 2016 test year data. RSL has not provided comprehensive forecasts for a 2017 test year.

In addition, RSL has been informed by counsel that it erred when identifying an "effective date" of January 1, 2017 in its original Application. RSL intended to propose an "implementation date" of January 1, 2017 while maintaining an effective date of May 1, 2016. RSL does not intend to move to a January 1 effective date for rates.

The effective and implementation date for 2016 rates as agreed upon in this settlement is in issue 5.2.

Evidence:

Application: Exhibit 1, Tab 6, Schedule 2.

IRRs: 1- Staff-1; 1-VECC-4.

3. Load Forecast, Cost Allocation and Rate Design

3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of Rideau St. Lawrence Distribution's customers?

Complete Settlement: RSL agrees to use the 2016 actuals for the 2016 customer/connection forecast. As the load forecast represents the actual consumption for 2016, CDM impacts are embedded in the forecast.

Subject to the above, the Parties agree that the customer forecast, load forecast, loss factors, CDM adjustments and the resulting billing determinates are appropriate and are reflective of the energy and demand requirements of the Applicant's customers.

The adjusted load forecast is presented below as Table 3-1A:

Table 3-1A Load Forecast

	Original

As noted in issue 4.2 below, the Parties further agree that the threshold for future LRAMVA requests will be established using the IESO's final verified 2016 CDM savings report.

Evidence:

Application: Exhibit 1, Tab 2, Schedules 3 and 7; Exhibit 3, Tabs 1 and 2; Appendix 3.1, Appendix 3.2; Appendix 3.3, Exhibit 7; and Exhibit 8.

3.2 Is the proposed cost allocation methodology, and are the allocations, and revenue-to-cost ratios appropriate?

Complete Settlement: RSL agrees to use 2016 load forecast actuals for the purposes of the cost allocation model.

The Parties also agree to adjust the revenue-to-cost ratios from the cost allocation model to ensure that all classes are within the Board's accepted range. Those adjustments have been made by moving the revenue-to-cost ratios to the edge of the OEB range, if outside of the range, and then beginning with the lowest revenue-to-cost ratios, as determined by the cost alloction model, and increasing it until it matches the next lowest revenue-to-cost ratio, then continuing to increase each in this manner until the revenue requirement is balanced.

Subject to the above, the Parties agree that the cost allocation methodology is appropriate and results in revenue-to-cost ratios that are within the OEB's permitted ranges. These revenue-to-cost ratios are reproduced below in Table 3-2A.

Table 3-2A
Revenue to Cost Ratios

	Cost Ratios	Proposed	Board	Board
	Cost Allocation	Revenue To	Target	Target
Customer Class	Model	Cost Ratio	Low	High
Residential	92.11%	92.63%	85.0%	115.0%
General Service Less Than 50 kW	111.95%	111.95%	80.0%	120.0%
General Service 50 to 4,999 kW	114.20%	114.20%	80.0%	120.0%
Street Lighting	132.12%	120.00%	80.0%	120.0%
Sentinel Lighting	81.11%	92.63%	80.0%	120.0%
Unmetered Scattered Load	108.83%	108.83%	80.0%	120.0%

3.3 Are Rideau St. Lawrence Distribution's proposals for rate design appropriate?

Complete Settlement: The Parties agree that RSL's proposals, including the proposed fixed/variable splits, for rate design are appropriate. The distribution charges resulting from this Settlement Proposal are produced below as Table 3-3A.

Under the OEB's Policy entitled "A New Distribution Rate Design for Residential Electricity Customers" (EB-2012-0140), distributors are required to structure Residential distribution rates so that al costs for distribution service are collected through a fixed monthly charge within four years.

The Parties agree to the proposed implementation of a fixed monthly distribution charge for Residential customers over four years. This is the first year of a four-year transition.

Table 3-3A 2016 Proposed Distribution Charges

	Current				Fixed/
	Distribution	Original			Variable
Customer Class	Rates	Application	Adjustments	Settlement	Split
Residential					
Monthly Service Charge	13.19	17.91	-0.88	17.03	65.05%
Distribution Volumetric per kWh	0.015	0.0128	-0.0006	0.0122	34.95%
General Service Less Than 50 kW

3.4 Are the proposed Retail Transmission Service Rates and Low Voltage Service Rates appropriate?

Complete Settlement: The Parties agree that the proposed forecast of Retail Transmission Service Rates shall be based on 2017 Hydro One rates. This will help reduce variances going forward.

Low voltage costs were calculated by taking the three-year average volume billed by Hydro One between 2013 and 2015, and applying the 2017 Low Voltage rates charged to RSL by Hydro One. Costs were allocated to each customer class by calculating the percentage of Retail Transmission Connection costs that would be billed to each class using the load forecast based on 2016 actual kWh and kW. Low Voltage costs were allocated based on these proportions, and are the basis for the resulting rates.

Retail Transmission Service Rates service rates have been reproduced below in Table 3-4A. Low Voltage Rates have been reproduced below in Table 3-4B.

Table 3-4A Retail Transmission Service Rates

	Current	
	RTSR	RTSR
Customer Class	Rates	Settlement
Residential		
Retail Transmission Rate - Network Service Rate per kWh	0.0082	0.0073

4. Accounting

4.1 Have all impacts of any changes in accounting standards, policies, estimates and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

Complete Settlement: The Parties agree that the impacts of any changes in accounting standards, policies, estimates and adjustments have been properly identified, and the treatment of each of these impacts is appropriate.

Evidence:

Application: Exhibit 1, Tab 4, Schedule 5; Exhibit 1, Tab 6, Schedules 14 – 15; Exhibit 2, Tab 5, Schedules 3 – 4; Exhibit 4, Tab 3, Schedule 4; Exhibit 6, Tab 2, Schedule 3.

4.2 Are Rideau St. Lawrence Distribution's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, and the continuation of existing accounts, appropriate?

Complete Settlement: The Parties agree that RSL's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition and the continuation of existing accounts, are appropriate, subject to the following adjustments:

- RSL agrees that it will use the 2015 actual balances in its deferral and variance accounts and will only accrue interest in this account to April 30, 2016.
- The Parties further agree that the threshold for future LRAMVA requests will be established using the IESO's final verified 2016 CDM savings report.

A summary of the variances accounts and balances for disposition are included in Table 4-2A.

5.2 *What is the appropriate effective date for 2017 rates?*

Complete Settlement: As noted in the settlement of issue 2.3 above, the Parties have agreed that the test year is 2016. For the purposes of settling all of the issues in this proceeding, the Parties agreed that both the implementation date and effective date for 2016 rates should be the earliest date that RSL can implement the Board's decision and order approving distribution rates and other charges in this application.

RSL's existing Distribution Rates were declared interim by the OEB, effective January 1, 2017. This agreement foregoes foregone revenue.

Appendix A Rideau St. Lawrence Distribution Inc. Proposed Tariff of Rates and Charges Effective and Implementation Date June 1, 2017

Effective and Implementation Date - June 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2015-0100

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning.

Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Service Charge	\$	17.03

EB-2015-0100

GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION

This classification applies to a non-residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

EB-2015-0100

GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW.

Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

EB-2015-0100

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Effective and Implementation Date – June 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2015-0100

SENTINEL LIGHTING SERVICE CLASSIFICATION

This classification refers to accounts that are an unmetered lighting load supplied to a sentinel light. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

RETAIL SERVICE CHARGES (if applicable)

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$/cust.	0.50
Distributor-consolidated billing charge, per customer, per retailer	\$/cust.	0.30
Retailer-consolidated billing credit, per customer, per retailer	\$/cust.	30
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year no charge		
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0819
Total Loss Factor – Secondary Metered Customer > 5,000 kW	N/A
Total Loss Factor – Primary Metered Customer < 5,000 kW	1.0711
Total Loss Factor – Primary Metered Customer > 5,000 kW	N/A

SCHEDULE B: TARIFF OF RATES AND CHARGES DECISION AND ORDER RIDEAU ST. LAWRENCE DISTRIBUTION INC. EB-2015-0100 JUNE 15, 2017

Effective and Implementation Date July 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

FB-2015-0100

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning.

Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

EB-2015-0100

GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION

This classification applies to a non-residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

FB-2015-0100

GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.
