I read with interest of hydro one's application to raise pole rental rates for small phone and internet suppliers from 22 to 70 dollars per year. Just what we need! More small businesses shutting down and higher rates from those that survive!

Hydro one's litany of bad decisions and poor management is open for all to view. The auditor general's last couple of reports before the gov't threw a shield of secrecy around the company by selling off shares demonstrated how despite the billions of dollars wasted power outages at hydro one occur more frequently and last longer than a decade earlier. It also showed how hydro one repeatedly asked for rate increases for aging equipment and after the increases were approved only about 1/3 of the equipment was replaced. Hydro one's lack of maintenance and poor decision-making are not an excuse to start penalizing businesses and customers who actually make good responsible decisions.

Reject hydro one's application to increase rates today.
