\_Re application for rate increase EB-2017-0049 **ONTARIO ENERGY BOARD**

Please see the attached bills for electricity used in my two residences to illustrate what is broken in our electricity management in Ontario.

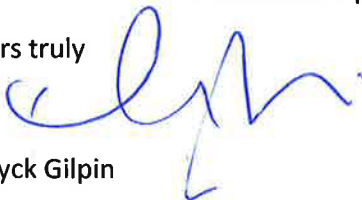

For a small condominium in Florida, the consumption of 185 kWh used resulted in a bill of \$26.59 or 14.37 cents per kWh.

For my Ontario residence, the consumption of 719.72 kWh used resulted in a bill of \$269.76 or 37.48 cents per kWh.

The talent and effort required to so totally mismanage our electricity file is almost impossible to comprehend.

Translate these costs to manufacturing or any business with the ability to relocate and I truly believe that we are doomed as a province.

Yours truly

Deryck Gilpin
