It now time to get Hydro one to realize that if the consumer must Sqwiz every penies to break even. They also have to be Accountable, more efficient, Much better at doing the job with less We can see on Job sites mostly new equipment and when these equipment are being replaced to new the supposed to used equipments, Sub contractors are in line to get supper good deals Plus, it looks like there is never enough people on all sites and every one has there own trucks While hydro one network make big efforts on showing they are getting the job done, They also make a bad impression of only Faking the make it good In My Opinion we are now looking as bad as Hydro Quebec and trying to compete on, who can grab up money from the less fortunate.

The must remember who has to pay their very high pay cheques
