Subject: Electricity Rate Increase

Dear Board Secretary,

This is with regard to the proposed electricity delivery rate hikes boondoggle. Lower the rates for usage and increase the rate of deliver, and make it look like we are saving money!

Ridiculous Nonsense!

The proposed delivery rate increase is going to impact low income earners, people on disability pension, and those who have live on CPP and OAS pensions. All businesses, large and small, will be negatively affected. Small businesses will struggle especially because of the new wage increases coming into effect. Many will be forced to downsize, to close or may face bankruptcy.

The province produces a surplus of electricity which is sold to the U.S. At a much cheaper rate than that which we pay. is their delivery charge also going up?

I am absolutely against any rate increases, whatsoever, until Hydro One Inc. and Hydro One Network are run efficiently, and the debt is paid down. I cannot understand why the executives are receiving bonuses, for a business which seems to be in the business of running a deficit.

Most Sincerely,
Linda McQuay
