Five years ago I retired and moved to this small rural community. When I arrived Hydro One crews were working trimming tree branches away from hydro lines. What should have taken weeks took months...it was a very excessive work schedule. On the other side of the spectrum, it is a well documented fact that the upper management at Hydro One are consistently on "The Sunshine List". During the winter months, I basically live in the dark. I have battery operated candles and I normally burn one LED lamp while watching television in the evenings. Most times I leave my laundry till the weekends. I have a wood stove that prevents the furnace from running as constant as it might and of late I have been shutting off my hot water heater for days, to avoid extra power usage. Hydro One assures me I am doing all the right things when it comes to TOU. I am upset with the fact my actual usage is doubled and another \$12.00 added to that for delivery charges. We recently received the 8% rebate. If this Application is accepted we would recognize a 15% increase or more. As a taxpayer I would hope the OEB would make the right decision and stand up for the rights of retirees and the working class citizens of Ontario.
