Making Hydro One a private corporation was, in my opinion, a huge mistake. This application should be thrown out by the government. Utilities should be government owned, by the people, and rates managed equitably across the country. Ontario pays more than any other province and we, the citizens, are being seriously gouged. Hydro One should not be granted any additional increases in rates for any service until the overcharging has been rectified and lowered rates in place and citizens have received refunds for overpayments.

At our old residence, [REDACTED], we received threatening letters from Hydro One because our invoice was Thousands of dollars, despite all of our lights had been replaced by lead. Why are we paying more when we converted everything in our house to lead. Our monthly bill was roughly \$900. We had to sell our house, despite upgrading our lights, purchasing energy efficient appliances and watching our electricity with metres. These large electric bills increased with the 3 tier system, even though we abided by the tiers. Something is seriously wrong when a middle income family has to sell their home and move into a smaller home in very large part because of our electricity bill! No More Increases!!
