The cost of electricity has increased "through the roof" in the past few years, to the point where many people cannot afford it, even with the promise of relief by the current government. Electricity is not a commodity in today's society, it's a necessity! Rather than a rate increase, Hydro One needs to be told that they must reign in their costs and find savings in their own organization, just as most companies have had to do in the past few years in order to stay competitive!
