To whom it may concern at the Ontario Energy Board,

I am writing to voice my concerns regarding Hydro One's application (form attached) to increase delivery charges over the next five years. The increases proposed add up to a 4% increase. This amount is a higher percent increase than I get each year in my income. I feel the company Hydro One needs to manage their business more efficiently so they don't need to gouge the consumer for "delivery" charges. One example of waste is when I see four or five trucks with two workers with each truck all working on one line in one location. In these situations I rarely see one or maybe two trucks actually doing line work and the others are just there. Why not spread the workers out to get more work done in one day? Also paying the CEO and other top "managers" huge multi million dollar salaries and then bonuses is wasteful. The consumer does not need to pay more for delivery charges when we don't get any benefit from these increases and they are often more than the cost of living increase.
