Any costs associated with any part of Hydro One's supply and delivery of electricity needs to be reduced in order to allow the residents of Ontario, and the owners of the utility, to be able to afford these services. The long term contracts for green energy projects need to be abolished without penalty to the government, so that the end-users of these projects do not suffer any more burdens created by OUR mismanaged utility. Ontario has one of the largest supplies of cheap hydro electricity in the world, which should be supplying Ontarians with the cheapest rates in the world. Ontarians deserve to pay a fair and equitable price for Electricity that compares to the cheap rates that we are selling our excessive hydro to the Americans for. There is no reason that we should be selling Hydro to foreign countries for less than what the Owners (Ontarians) are paying for electricity. This increase is completely unreasonable, and will do nothing more than continue to put the lower income wage earners and seniors in our province out on the street or frozen in their homes in the winter.

Hydro One and it's affiliates must STOP RAPING the owners of this utility and fix this broken Bureaucracy.
