The electricity Industry in Ontario is out of control with the highest rates in Canada. Why is the Government of Ontario having to provide an 8% rebate on our bill which has been generated by a Public utility company? Because it is 71% owned by the government of Ontario and the rest is owned by the public.

In 2015 it generated a profit of \$713m. Their rates have increased at 8X the rate of inflation since 2011. There appears to be a degree of collusion and the "Fox taking care of the Hen house" here. This company has a corporate structure that is truly out of whack with 40 directors and executives all earning inflated salaries while many Ontarians struggle every month to make ends meet. The province is losing manufacturing because of the ridiculous energy costs. My delivery charges are already twice as much as the cost of the Hydro I use. These rate increases are unjustified and I urge you to do the Right Thing by denying them. Here is an article and comparison of Canadian electricity rates. http://www.randyhilliermpp.com/hydro_facts
