I'm wondering what the need for a rate increase is justified by? If several assests were attained what is the reason for further increasing hydro rates again? I'm considering moving in out of any rural area if this continues.

This is an essential service in modern times and many companies are making it harder for families due to skyrocketing utility bills. Corporate greed is the only reasoning behind this in Ontario, hydro one service has been spotty at times, where's my money back from lack of service and inconvenience? I should start sending a bill back for hydro outages if I'm paying for a service and not getting it.
