What are these increase for ? the cost of the so-called green energy wind mills and solar panel. Or the fact that our province used to be rich in wealthy businesses that now have smartly moved away from a too expensive for their profit margin environment.

In the last 35 years, I have purchased so called newer technology to reduce my energy use and the expected saving has never materialized because my bill keeps on going up .  
Unless the real business case is presented I vote no to these increases.
