I object to this application for rate increase on the basis that there is absolutely no evidence that this Ontario Utility has or is doing anything to control costs. If private enterprise simply increased cost to customers when they wished for income increase, there would be few tax paying enterprises left in Ontario. By granting these increases you are merely gifting Hydro One continued and increased inefficiency and that is no responsible way to run a government. Hydro One and OPG are completely out of step with the reality of working Ontario enterprise.
