The provincial government has acknowledged that hydro rates are already too high, and are a burden to the customers.

As a customer in low density area it is even higher and harder to keep up with the large increases. Now that it is a public company there needs to be an option to purchase hydro from other public companies because as a monopoly it is unfair to continue to raise rates and charge the consumer for the mistakes made by the corporation. I will agree with rate increases when the salaries of the top executives are cut to a normal level. I should not have to live in darkness while friends of the government continue to get ridiculous paycheques.
