I filled out form but it disappeared. As prices continue to rise we have to live at lower and lower temperatures. 62F in the day and 58F at night is a heat wave. Still our bills take our entire pension. Seniors at home all day are paying the highest rates during the day so they have to live in cold dark homes. As it gets more expensive you will have more frozen seniors falling down in the dark. we could not afford that phone so we had to disconnect it. But the form would not allow me to submit without one. These constant rises due to mismanagement are unacceptable And the fact no one ever told us that the new smart meters put out 100 times the EMFs than cell phones is criminal. What if your child is sleeping next to that? What kind of foolish people are in charge?
