The Ontario Government has just stepped in to ensure that Hydro Rates are reduced and fair. The Government has already advertised that rates would fall 25% but given that there was already a 8% rate adjustment, that amount is truly only 17%. Now Hydro is proposing another hike that will reduce that % even further. I truly hope that the Ontario Energy Board turns down the Hydro application for increases. What I would like to see is Hydro overhaul their operations and determine ways that they can operate more efficiently.

I would also like to see a full assessment done on the import/export costs of Hydro - I am sure that there are contracts in place that no longer make sense and it is time for a change.
