I understand that distribution rates charge is required to cover for the losses and the maintenance. But part of this distribution rates is a SCAM. I live on airport road in Caledon where the power lines go the Town of Caledon.

The residents in the town of Caledon do not get charged normal residential rates but I get charged low density even though I get power from the line much before Caledon Town so my distribution rates should be much lower than the town. Yet I have to pay distribution rates that are almost 100% of my usage and demand. Can't believe there is no one listening to me. I tried to write before and even called up. This should be a very fair process. We all pay taxes and we should be treated fairly. BTW: My monthly bills are close to \$400 even though I have all the smart setups etc...\$200 is distribution. I feel like I am being robbed of \$ 200 every month by Hydro One.

Thanks.

Romeo Jack Barbosa
