This increase is ridiculous to consider. I already pay more in delivery charges than I do for the actual power that I consume. It is nearly impossible to save money by attempting to ration electricity, as these fees keep going up to offset their losses.

I believe that these latest proposed fee changes are simply a way for them to recoup the 17% rate reduction that should be coming into effect soon, rather than affect any sort of positive change in the service.

Please, don't let Hydro One continue to increase our costs.
