Address: [REDACTED]

We are already charged an astronomical amount for hydro. Increasing the delivery charge is ridiculous. There are seniors, minimum wage earners, welfare recipients who live in the area. How do you expect them to pay this ridiculous cost and be able to live. How about laying off the all the people on the Sunshine list instead of expecting low income earners to cover whatever costs you image need to be covered. You charged us over 20 years on the Debt when you paid the CEO his bonus. The time now is to look out for the little people instead of the money grubbers and get rid of these so called smart meters. I can't believe you charge people who do not even have a smart meter hooked to their home (eg) house burned down.
