Hello,

I do not live in rural Ontario, but I don't need to be there to here the major issues that people are having and the complete and utter lack of anything resembling of a government who serves the people.

I think Hydro One has a huge set of balls asking for a rate increase when Hydro in Ontario is already has some of the highest rates in North America.

You want to approve anything approve lowering the executives salaries at OPG and Hydro One. They are WAY to much, and its insane when Ontarians are being disconnected because they can't pay there bill.

No one seems to understand that everyone is always asking to increase there fees and and rates without considering that other companies, renting, other bills, and the worst tax grab ever making it more difficult for people to continue paying basic bills.

I need to repeat This: Hydro is now a necessity along with food, water, and shelter it should not be a luxury. So Hydro One asking to raise rates and fees is a slap in the face to the Ontarians who are already struggling.

Also, this is also insane because everyone told the liberals that this was going to happen if hydro one went private and now that Hydro Ones primary focus is through share holders and profit they will do anything to make sure there bottom line is met.

So I have a question when everyone is disconnected and Hydro One has no customers left how will Hydro One pay their share holders then.

Kathleen Wynne and her master Darth Dalton should both be investigated and thrown in jail. They both caused this mess and are continuing to make it worse, third fair hydro plan is a joke and helps no one if you have to pay more after 4 years and everyone keeps raising their prices.

In conclusion, if the board approves this rate hike you should all be ashamed because you will be letting people know who really care about and it's not the people you are supposed to be protecting.
