there should be a moratorium placed on all hydro rate increases, no matter which line of the bill they affect. Ontario business owners and residential customers have already become overburdened by the mismanagement of Ontario energy resources. We should not need to hope rate increases are offset by governmental Acts that may or may not stay in effect when parties change over at the next election. If Ontario hydro needs rate increases to make their bottom line look good, then hydro One should look at cost cutting within their own organization, cutting out wasteful spending in the form of useless advertising, and increasing the cost of exported energy to the equivalent of energy sold inside the province. Review every part of the problems that have caused the high cost of energy to find a solution that is fair and equitable. Hydro One needs to take responsibility for their management or lack thereof.
