Not in favor of this rate hike (Gouge!!!!!!).

Hydro rates (like Gas) have a significant cost impact on downstream goods and services. So when the rate is increased, it is not just Hydro rates that go but Cost-of-Living rates also increase proportionally. Getting control of Cost-of-Living drivers should be a top priority of any government institution. Any rate hikes in Cost-of-Living influencers should be reviewed thoroughly and only sanctioned in extreme cases.

Needless to say the entire business of Ontario Hydro Generation is out of control. Prior to any Rate hike, would it not make more sense to assess the entire business model, and find practical, rational and cost-effective ways to "operate the business" and reduce costs.

But expecting government run or monopoly institutions to operate efficiently goes against the principle of "common sense".
