I disagree strongly with this application for a rate increase. Hydro One customers already pay some of the highest rates in Canada for electricity. If the utility needs to increase its bottom line, look to reducing senior executives salaries. The sunshine list published annually certainly includes many Hydro One execs. The CEOs salary at 8 times more than any other utility CEO is paid is almost criminal. Another practice that borders on absurdity is paying US states to take our excess power. Start selling excess power to increase Hydro Ones profitability and leave rates for your already over charged clients as is.
