To Whom This May Concern:

Ontario Premier Kathleen Wynne made an agreement with Hydro One to give this company money whether they produced a certain amount of energy or not. I was quite disgusted when I read the article about how the consumers being "green," only meant that the government would give Hydro the same amount of money regardless whether they produced the energy or not. Also, it meant that there was a surplus of energy which was sold to the States and the Americans paid a lot less for energy than the Canadians. This company has made too much money already and the hydro keeps going up.

I am retired now and can not afford to have the cost of utilities rising all the time when my pension is not going to be able to keep up with the rising costs of everything---property tax, utilities, fuel for car, food, clothes, entertainment etc....basically all living expenses are rising.

After the deal this company received from Kathleen Wynne, it is about time that the cost of having hydro is kept low.

Thank you.

Ingrid Hardy
