I cannot believe they are even considering a rate hike. I have gone to great expense to lower our hydro bill. New high efficiency appliances and hundreds of dollars worth of cfc and now led light bulbs ,new furnace ,hot water heater etc. So everything I am trying to save is basically a lost cause, as it will be lost to a rate increases . Frustrating ...you bet .I am saving nothing. How about cutting the earnings of the CEO and other executives to equal the increases that will surely happen. I am sure this is not the end of the gouging. I know all of my family feel the same way. I fear for our children and the rates they will face in the future, were will it stop?. A frustrated Ian Magee
