The people of this province have had more than they can take dealing with the fallout from the Liberal government's failed green energy programs in terms of sky high electricity bills, lost jobs, wind and solar farms being shoved down their necks, like it or not, in the rural sector of course since they wouldn't dare try it in the GTA or Ottawa. I am a senior living on fixed income and while I am not scraping for every penny I do have to watch what I spend, especially since the passing of my husband in April. It's about time the people who built this province and the people who are trying to keep it going, substitute taxpayers, got a break but with this government it's the old story, give with one hand and take back with two. Do the right things and deny this application.
