PREAMBLE

This Settlement Proposal is filed with the Ontario Energy Board (the "OEB" or the "Board") in connection with the application of Enbridge Gas Distribution Inc. ("Enbridge" or the "Company"), for an order or orders approving the clearance or disposition of amounts recorded in certain Deferral or Variance Accounts.

On May 25, 2017, the OEB issued its Notice of Application and Direction Letter in this proceeding.

In Procedural Order No. 1, dated June 14, 2017, the Board established the process to address the application, up to and including a Settlement Conference.

In Procedural Order No. 2, dated June 29, 2017, the OEB indicated that it would defer consideration of the final disposition of Enbridge's 2016 Greenhouse Gas Emissions Impact Deferral Account (GGEIDA), but would consider whether the balance in that account should be disposed of on an interim basis in this proceeding.

A Settlement Conference was held on July 26, 27 and 28, 2017. Chris Haussmann acted as facilitator for the Settlement Conference. This Settlement Proposal arises from the Settlement Conference.

Enbridge and the following intervenors, as well as Ontario Energy Board technical staff ("OEB Staff"), participated in the Settlement Conference:

- Association of Power Producers of Ontario (APPrO)
- Building Owners and Managers Association – Greater Toronto (BOMA)
- Consumers Council of Canada (CCC)
- Energy Probe Research Foundation (Energy Probe)
- Federation of Rental-Housing Providers of Ontario (FRPO)
- Industrial Gas Users Association (IGUA)
- School Energy Coalition (SEC)
- TransCanada PipeLines (TCPL)
- Vulnerable Energy Consumers Coalition (VECC)

The Settlement Proposal deals with all of the relief sought in this proceeding. There is no Issues List, but the parties have agreed that the issues to be addressed are: (i) the Deferral and Variance Accounts proposed for disposition within Appendix A to Enbridge's Application; and (ii) the appropriate unit rates and timing for implementation of the clearances of certain accounts. The first issue is addressed with reference to each of the Deferral and Variance Accounts for which clearance is requested, under items (a) to (s) of Issue 1.

All intervenors listed above participated in the Settlement Conference and subsequent discussions. OEB Staff is not a party to the Settlement Proposal. Although it is not a party to the Settlement Proposal, once the Settlement Proposal is filed, OEB Staff will file a submission commenting on two aspects of the settlement: whether the settlement represents an acceptable outcome from a public interest perspective, and whether the accompanying explanation and rationale is adequate to support the settlement. Also, as noted in the Practice Direction on Settlement Conferences, OEB Staff who participated in the Settlement Conference are bound by the same confidentiality and privilege rules that apply to the parties to the proceeding.

This document is called a "Settlement Proposal" because it is a proposal by the parties to the Board to settle the issues in this proceeding. It is termed a proposal as between the parties and the Board. However, as between the parties, and subject only to the Board's approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and is binding and enforceable in accordance with its terms. As set forth below, this Settlement Proposal is subject to a condition subsequent, that if it is not accepted by the Board in its entirety, then unless amended by the parties it is null and void and of no further effect. In entering into this agreement, the parties understand and agree that, pursuant to the *Ontario Energy Board Act, 1998*, the Board has exclusive jurisdiction with respect to the interpretation or enforcement of the terms hereof.

Enbridge and all intervenors listed above, except for TCPL, have agreed to the settlement of the issues as described on the following pages. TCPL has agreed to certain aspects of the settlement (as specifically identified in the following pages), but TCPL takes no position on any of the other issues listed in the Settlement Proposal. Any reference to "parties" in this Settlement Proposal is intended to refer to Enbridge and the intervenors listed above, taking into account that TCPL takes no position on any issue except as otherwise expressly identified below. The description of each issue assumes that all parties participated in the negotiation of the issue, unless specifically noted otherwise.

Best efforts have been made to identify all of the evidence that relates to each settled issue. The supporting evidence for each settled issue is identified individually by reference to its exhibit number in an abbreviated format; for example, Exhibit B, Tab 3, Schedule 1 is referred to as B-3-1. The identification and listing of the evidence that relates to each settled issue is provided to assist the Board.

The Settlement Proposal describes the agreements reached on the issues. The Settlement Proposal provides a direct link between each settled issue and the supporting evidence in the record to date. In this regard, the parties are of the view that the evidence provided is sufficient to support the Settlement Proposal in relation to the settled issues and, moreover, that the quality and detail of the supporting evidence, together with the corresponding rationale, will allow the Board to make findings agreeing with the proposed resolution of the settled issues.

None of the parties can withdraw from the Settlement Proposal except in accordance with Rule 30 of the *Ontario Energy Board Rules of Practice and Procedure*. Further, unless stated otherwise, a settlement of any particular issue in this proceeding is without prejudice to the positions parties might take with respect to the same issue in future proceedings, whether during the term of Enbridge's 2014 to 2018 Incentive Regulation plan, or thereafter.

The parties acknowledge that all data, documents or information provided and any discussions, including negotiations, admissions, concessions, offers and counter-offers occurring during the course of the Settlement Conference (settlement information), including subsequent related discussions, are privileged and confidential and without prejudice in accordance with (and subject to the exceptions set out in) the Board's *Practice Direction on Settlement Conferences* (see pages 5-6 of the OEB's *Practice Direction on Settlement Conferences*, as Revised October 28, 2016).

It is fundamental to the agreement of the parties that none of the provisions of this Settlement Proposal are severable. If the Board does not accept the provisions of the Settlement Proposal in their entirety, there is no Settlement Proposal (unless the parties agree that any portion of the Settlement Proposal that the Board does accept may continue as a valid Settlement Proposal).

OVERVIEW

Enbridge's prefiled evidence details its 2016 Earnings Sharing Mechanism calculation, and the amount recorded in the 2016 Earnings Sharing Mechanism Deferral Account. The prefiled evidence also sets out and explains the other Deferral and Variance Account balances that Enbridge seeks to have cleared, along with several Deferral and Variance Account balances to be carried forward for review and approval in a future proceeding. The list of Deferral and Variance Accounts for which Enbridge has requested clearance was attached to the Application, and is reproduced at Appendix A to this Settlement Proposal (with a small number of changes, as noted below).

Through the Settlement Conference process, all parties have agreed that it is appropriate for Enbridge to clear the balances from the Deferral and Variance Accounts as set out and explained within the prefiled evidence and interrogatories, subject to three changes: (i) Enbridge will not clear the DSM-related accounts in this proceeding, as the final amounts are still subject to review in other proceedings; (ii) the principal balance in the 2016 Credit Final Bill Deferral Account (CFBDA) has been increased by \$480,000; and (iii) Enbridge will not clear the Greenhouse Gas Emissions Impact Deferral Account (GGEIDA) in this proceeding.

All parties have agreed that it is appropriate that the balances in the relevant accounts be cleared over two months, in conjunction with Enbridge's October 1, 2017 QRAM proceeding.

Details of the settlement are set out in the Issues section that follows.

THE ISSUES

1. Are the proposed balances for recovery / refund recorded in the following deferral and variance accounts appropriate?

The Deferral and Variance accounts for which Enbridge seeks clearance are set out in Exhibit A, Tab 2, Schedule 1, Appendix A, from Enbridge's prefiled evidence. A copy of that document (with the updates to reflect the three changes noted in the Overview above) is attached as Appendix A to this Settlement Proposal.

The parties have agreed to the clearance of each of the Deferral and Variance Account balances, and interest amounts, listed in Columns 3 and 4 of Appendix A. All parties have also agreed that the balances in the other accounts listed in Appendix A (those for which clearance is not requested at this time) will be carried forward for review and approval in a future proceeding.

I.C.EGDI.CCC.8	CCC Interrogatory #8

(f) 2016 Average Use True-Up V/A (2016 AUTUVA)

All parties agree that the principal balance in the 2016 AUTUVA, which is shown in Appendix A, along with applicable interest, will be cleared as set out under Issue 2, below.

The AUTVA was first established in EB-2007-0615 and continued in Enbridge's current approved 5 year IR Plan.

The purpose of the AUTUVA (as set out in the Accounting Order establishing the account) is to record ("true-up") the revenue impact, exclusive of gas costs, of the difference between the forecast of average use per customer, for general service rate classes (Rate 1 and Rate 6), embedded in the volume forecast that underpins Rates 1 and 6 and the actual weather normalized average use experienced during the year. The calculation of the volume variance between forecast average use and actual normalized average use will exclude the volumetric impact of Demand Side Management programs in that year. The revenue impact will be calculated using a unit rate determined in the same manner as for the derivation of the Lost Revenue Adjustment Mechanism (LRAM), extended by the average use volume variance per customer and the number of customers.

While there are no unsettled issues with respect to the disposition of the 2016 AUTUVA balance, parties sought clarity on the derivation of the AUTUVA balance and on the average use forecast determined through the Board-approved average use models. Enbridge confirmed that the average use models are used to set the volume forecasts that are "trued-up" through the AUTUVA. The average use models are not used in the AUTUVA calculations.

In light of the foregoing, parties have asked Enbridge to provide more clarity about the elements of the AUTUVA calculation. In response, Enbridge has agreed that it will provide the following evidence in its 2018 Rate Adjustment proceeding:

- a. Evidence, regarding how Enbridge undertakes:
 - i. Establishment of baseload;
 - ii. Establishment of heatload per customer; and
 - iii. Customer count
- b. If applicable, evidence outlining any changes made since rebasing, to the methodology, parameters and assumptions of related to the determination of the items above.
- c. If there were any changes made to its calculation of the AUTUVA balances since rebasing, an analysis of the impact of the change by showing the difference between the actual normalized average use for each year, and what the amount would have been if no changes had been made.
- c. Forecast volumes and customer meters on a monthly basis including the forecast monthly figures for baseload and heatload per customer. In the 2018 Earnings Sharing Mechanism proceeding, Enbridge will provide these figures on an actual basis.

Enbridge also agrees that if it requests an average use true-up mechanism in its next rebasing case, then Enbridge will file a study reviewing what other practices regarding average use true-up are approved for other utilities and how they compare to what Enbridge proposes. As part of this study, Enbridge would indicate the impacts of using the different practices and what is industry best practice, if this differs from Enbridge's proposed average use true-up approach.

(g) 2016 Earnings Sharing Mechanism D/A (2016 ESMDA)

There are no unsettled issues with respect to this account. All parties agree that the principal balance in the 2016 ESMDA, which is shown in Appendix A, along with applicable interest, will be cleared as set out under Issue 2, below.

All parties agree that the clearance of this account does not signify any agreement with or acceptance of Enbridge's changes to capitalization rates for certain expenses, which are set out in response to BOMA Interrogatory #18. All parties agree that Enbridge's approach to capitalization of these expenses may be addressed in Enbridge's next rebasing case and that the acceptance of Enbridge's ESM amounts in this proceeding shall not be taken as agreement with or acceptance of Enbridge's changes to capitalization rates.

This methodology, which is intended to smooth significant variances over future years, is consistent with the treatment and clearance of amounts which have been recorded within the previously approved PTUVAs.

There are no unsettled issues with respect to this account. All parties agree that (\$5) million from the 2016 PTUVA, which is shown in Appendix A, along with applicable interest, will be cleared as set out under Issue 2, below. The remaining (\$4.7) will be carried forward to the 2017 PTUVA.

All parties agree that this \$480,000 should be added to the balance of the CFBDA, to be credited to customers. This results in a principal balance of \$2,004,400 in the 2016 CFBDA. All parties agree that this principal balance in the 2016 CFBDA, along with applicable interest, will be cleared as set out under Issue 2, below.

As set out in Procedural Order No. 2, the only matter related to the 2016 GGEIDA that is open to settlement is whether there should be an interim disposition of the amounts recorded in the account. All parties have agreed that there will be no interim disposition of the balance in the 2016 GGEIDA, and that all determinations about the disposition of the amount recorded in that account will be made in the Enbridge's 2018 Compliance Plan proceeding (EB-2017-0224) or another appropriate proceeding as determined by the Board.
