Electricity rates are already much higher than a reasonable price in Ontario.

I strongly oppose rate increases for hydro in my province of residence.

Please do not consent to this increase as it will only make the rich richer and the poor poorer. Besides having changed the meters to new "smart"

meters that are impossible to read (this allowing hydro to bill whatever they wish without anybody being able to actually monitor their consumption of electricity). Again, I oppose any rate increase for hydro.

There should also be a free market on electricity, some competition to hydro One would certainly bring some sense of justice to this thievery.
