I writing/submitting my strong objection to the submission to the OEB for a rate increase. Not only does the application request a distribution rate increase, but they are also applying to have the service charges on disconnection/reconnections, removal of load limiters, account collections and access to their poles all increased.

The application goes on further to say that these increases would be added to your bill before any rebates from the the Fair Hydro Act, 2017 are implemented. You may recall, Premier Wynne promised us electricity rate relief with her government's Fair Hydro Act. What the Premier didn't bother to tell anyone was that Hydro One would still be able to apply for rate increases despite this new law, and that this government's energy policies would continue to add burden to our already expensive electricity system.

So much for electricity rate relief. To the Premier and the Minister of Energy, I am sick-and-tired of their duplicitous electricity shell-game and empty promises. I strongly urge the OEB to decline their request for an increase. Thank you.
