This is ridiculous! When will enough be enough? We were promised electricity rate relief from the Ontario government instead of rate increases. Hydro is becoming unaffordable. We are a two income household and should be able to live comfortably and pay for our services and still have some money left over to bank. This is not the case, and I blame hydro for a fair portion of that burden. There's nothing like seeing your monthly bill increase over and over again, and also to receive a letter telling you how 'energy efficient' you are in comparison to your neighbours to make your blood boil. Hydro increases MUST stop. There will be a tipping point when the mismanagement and greed inspired increases will cause the average consumer to have to seek some alternative to Hydro and a lot of our other regular services, and we are nearing that point...
