I am writing this to strongly object to any rate increases related to electricity whether it be time of use rates or service fees. We are currently having to endure the highest hydro rates in Canada, yet, due to over inflated salaries, extremely high overhead, ie. Office staff and supervisory employees, and extremely overpaid executives, every time that a rate increase is requested the energy board seems to agree. I wonder if the energy board is on the payroll of hydro or the payroll of the people of Ontario. You certainly do not appear to be acting in the best interest of the people but in the profit of a company that was never intended to make money but to provided power to all of Ontarians at a reasonable cost. I do not agree with the governments' desire to keep adding the costs of their mistakes to my hydro bill. I certainly hope and pray that the others who feel this way will take the time to let you know their thoughts as this cannot continue.
