My husband works two full time jobs and we still cannot afford our hydro. He does not see our boys grow up because he has to work so much.

Our hydro in a rural area is almost \$300 per month, we cannot afford any more increases. Hydro should not be increased every year for the next 4 years.

It's robbing people and making families like us have to choose what to pay each month, food, electricity or rent/mortgages. No one should ever have to work so much that it affects their health and well being. All for what? To line the pockets of an already wealthy company and its associates. These increases are wrong morally and it's about time the OEB realizes how dire of a situation Ontario consumers are in. No more increases if anything it needs to decrease and be made more affordable. No reason for any increase other than greed. The people of Ontario are fed up and work hard without having to pay more for something that should be made affordable for all.
