I currently live in a very small 1 bedroom apartment and pay over 250 per month in heat and hydro in the winter and over 150 in the summertime - no base boards either! This is absolutely insane, how are we supposed to be able to contribute to our communities and live or become middle class when we are being expected to pay unrealistic amounts just to live day-to-day. As a recent graduate starting my career, it is daunting to realize I may never be able to pay off my student debt because I have to work day in and day out to afford to simply have water and heat..
