When it was announced by the Wynne government that hydro rates would decrease over the next couple of years in order to bring current relief to customers paying outrageous prices for hydro that did not have to happen in the first place, it was welcome short term respite from the real economic struggle myself and many Ontarian's are already dealing with. I did not agree with how the decrease was brought in because it is only deferring costs instead of making real changes to permanently reduce them. Allowing Hydro One rate increases regardless of how they are justifying them is simply not acceptable under any circumstances. We cannot afford to pay any more! Enough is Enough! It is within the OEB's power to listen to the people, please do so because the Wynne government and Hydro One are clearly deaf!
