As rural retires the delivery and debt reduction charges each month are more than the charges for energy used each month. City costs are much lower, if city rates were slightly increased rural rates would be greatly reduced. In 2015 Hydro had approx 30 men out to clear the bush for the hydro lines (1.5 km) it took them over 3 weeks this was ridiculous as 10 men should have completed it in 5-6 days. The work completed did not include proper clean up of private property. If this type of waste is typical they do not need or deserve any increase .
