The application goes on further to say that these increases would be added to your bill before any rebates from the Fair Hydro Act, 2017 are implemented.

You may recall, Premier Wynne promised an electricity rate relief with her government's Fair Hydro Act. What I don't understand and find underhanded is that the Premier didn't mention that Hydro One would still be able to apply for rate increases despite this new law. Furthermore the provincial government's energy policies will continue to add burden to our already expensive electricity system.

Not only does the application request a distribution rate increase, but it also appears to apply increases to charges on disconnection/re connections, removal of load limiters, account collections and access to hydro poles.

This is deception at its finest. Please be honest and upfront with your voting public.
