Dear Sirs

I am writing to express my objection to the proposed rate increases. There has been so much public criticism regarding the outrageous prices for hydro, I find it hard to believe that this proposal would even be considered. Instead of taking out increases in cost of operation on consumers that are already pushed to the edge of what they can afford, Perhaps the board could consider a wage cap on wages for OPG and Hydro One workers making over \$100,000 who according to the public website number in the hundreds. Or my other suggestion would be to put a surcharge on homeowners that have over a certain square footage. That way the public who try to be energy efficient and purchase smaller homes would not be penalized for those who choose to own huge homes.
Lynn Craig
