This is quite unbelievable! Premier Wynn announced (with great fanfare) a reduction in hydro rates - all the time knowing that a request for increasing distribution costs was in the works. The example shows a total of approximately \$12.00 monthly by the end of the five years. Of course those figures were based on a household using 750 kWh per month - MANY people use much more than that, consequently their cost would be much more.

The total Hydro bill will certainly not be reduced!!! How can the Ontario government treat its citizens so shabbilyshame !
