#### SETTLEMENT PROPOSAL

#### **Preamble**

Cooperative Hydro Embrun Inc. (the "Applicant" or "CHEI") filed a Cost of Service application with the Ontario Energy Board (the "OEB") on May 1, 2017 under section 78 of the Ontario Energy Board Act, 1998, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that CHEI charges for electricity distribution, to be effective January 1, 2018 (OEB file number EB-2017-0048) (the "Application"). The application was declared complete on June 22, 2017.

The OEB issued a Letter of Direction and Notice of Application on August 11, 2017. In Procedural Order No. 1, dated September 21, 2017, the OEB granted intervenor status to the Vulnerable Energy Consumers Coalition ("VECC"), and prescribed dates for the following: written interrogatories from OEB staff and VECC; CHEI's responses to interrogatories; a Settlement Conference; and various other elements in the proceeding. The OEB determined in Procedural Order No. 3, dated October 31, 2017, that OEB staff would be a party to the Settlement Conference and any settlement proposal arising therefrom.

Following the receipt of interrogatories, CHEI filed the majority of its interrogatory responses with the OEB on November 3, 2017, with the remainder of the responses filed by November 14, 2017.

On November 10, 2017 OEB Staff submitted a proposed issues list as agreed to by the parties. On November 13, 2017 the OEB issued its decision on the proposed issues list, approving the list submitted by OEB staff as the final issues list (the "Issues List").

The settlement conference was convened on November 22, 2017 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's *Practice Direction on Settlement Conferences* (the "Practice Direction").

CHEI, VECC and OEB staff participated in the settlement conference.

CHEI, VECC and OEB staff are collectively referred to below as the "Parties".

The role of OEB staff is set out on page 6 of the Practice Direction. OEB staff is a party to this Settlement Proposal and is bound by the same confidentiality and privilege rules that apply to the Parties to the proceeding.

This document is called a "Settlement Proposal" as this is a proposal by the Parties presented to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB approval of this

Cooperative Hydro Embrun Inc. EB-2017-0035 Settlement Proposal Page 7 of 57 Filed: December 22, 2017

Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

These settlement proceedings are subject to the rules relating to confidentiality and privilege contained in the Practice Direction. The Parties acknowledge that this settlement proceeding is confidential in accordance with the OEB's Practice Direction on settlement conferences. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings, and the rules of that latter document do not apply. Instead, in this settlement conference, and in this Settlement Proposal, the specific rules with respect to confidentiality and privilege set out in the *Practice Direction on* Settlement Conferences, as amended on October 28, 2016, apply. Parties have interpreted the revised Practice Direction to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counteroffers, and the negotiations leading to the settlement – or not – of each issue during the settlement conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the settlement conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the settlement conference but were a) any persons or entities that the Parties engage to assist them with the settlement conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include a) additional information included by the Parties in this Settlement Proposal, and b) the Appendices to this document. The supporting Parties for each settled issue, as applicable, agree that the evidence in respect of that settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context otherwise requires, include, in addition to the Application, the responses to interrogatories, responses to clarification questions and undertakings, and all other

Cooperative Hydro Embrun Inc. EB-2017-0035 Settlement Proposal Page 8 of 57 Filed: December 22, 2017

components of the record up to and including the date hereof, including additional information included by the Parties in this Settlement Proposal and the Attachments to this document.

Included with the Settlement Proposal are Attachments that provide further support for the proposed settlement. The Parties acknowledge that the Attachments were prepared by CHEI. While VECC and OEB staff have reviewed the Attachments, VECC and OEB staff are relying on the accuracy of the Attachments and the underlying evidence in entering into this Settlement Proposal.

For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List.

The Parties have reached a full settlement with respect to the issues in this proceeding.

According to the Practice Direction (p. 4), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB accepts may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties must agree with any revised Settlement Proposal as it relates to that issue, or take no position, prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not CHEI is a party to such proceeding, provided that no Party shall take a position that would result in the Agreement not applying in accordance with the terms contained herein.

Where in this Agreement the Parties "accept" the evidence of CHEI, or "agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

#### SUMMARY

In reaching this Settlement, the Parties have been guided by the Filing Requirements for 2018 rates and the Approved Issues List.

This Settlement Proposal reflects a full settlement of the issues in the proceeding. The Parties have described below, in detail, areas where they have settled an issue by agreeing to adjustments to the application as updated.

The Parties note that this Settlement Proposal includes all tables, appendices and the live Excel models that represent the evidence and the settlement between the Parties at the time of filing the settlement proposal.

A Revenue Requirement Work Form, incorporating all terms that have been agreed to in this Proposal is filed with the Settlement Proposal. Through the settlement process, CHEI has agreed to certain adjustments to its original 2018 Application filed May 1, 2017. The changes are described in the following sections.

CHEI has provided the following Table 1 highlighting the changes to its Rate Base and Capital, Operating Expenses and Revenue Requirement from CHEI's Application as filed as a result of interrogatories and this Settlement Proposal.

Table 1 - 2018 Revenue Requirement

	Application May 1 2017	IRR Nov 3 2017	Variance over Original Filing	Settlement Proposal Dec 22 2017	Variance over IRs
OM&A Expenses	\$721,971	\$721,971	\$0	\$681,971	-\$40,000
Amortization/Depreciation	\$165,121	\$165,121	\$0	\$162,155	-\$2,966
Property Taxes	\$0	\$0	\$0	\$0	\$0
Capital Taxes	\$0	\$0	\$0	\$0	\$0
Income Taxes (Grossed up)	\$4,631	\$4,623	-\$8	\$4,076	-\$546
Other Expenses	\$0	\$0	\$0	\$0	\$0
Return					
Deemed Interest Expense	\$79,719	\$79,681	-\$37	\$80,297	\$616
Return on Deemed Equity	\$165,233	\$165,157	-\$77	\$168,495	\$3,338
Service Revenue Requirement (before Revenues)	\$1,136,675	\$1,136,553	-\$122	\$1,096,994	-\$39,559
Revenue Offsets	\$29,789	\$29,658	-\$131	\$29,658	\$0
Base Revenue Requirement	\$1,106,886	\$1,106,895	\$9	\$1,067,336	-\$39,559
Gross Revenue Deficiency	\$198,507	\$210,224	\$11,717	\$191,647	\$18,577

Based on the foregoing, and the evidence and rationale provided below, the Parties accept this Settlement Proposal as appropriate and recommend its acceptance.

Table 2 below illustrates the updated Bill Impacts based on the results of this Settlement Proposal.

**Table 2 - 2018 Bill Impact Summary (Final)**

Cooperative Hydro Embrun Inc. EB-2017-0035 Settlement Proposal Page 11 of 57 Filed: December 22, 2017

# **RRFE OUTCOMES**

The Parties accept the Applicant's compliance with the OEB's required outcomes as defined by the Renewed Regulatory Framework for Electricity (RRFE). For the purpose of the settlement of the issues in this proceeding, and subject to the adjustments noted in this Settlement Proposal, the Parties accept that CHEI's proposed rates in the 2018 Test Year will, in all reasonably foreseeable circumstances, allow the Applicant to meet its obligations to its customers while maintaining its financial viability.

#### 1 PLANNING

# 1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:

- Customer feedback and preferences;
- Productivity;
- Reliability and service quality;
- Impact on distribution rates;
- Trade-offs with OM&A spending;
- · Government-mandated obligations;
- The objectives of the Applicant and its customers;
- The distribution system plan.

#### **Full Settlement**

Subject to the adjustment of the 2018 opening rate base to reflect an updated in service addition forecast for 2017 and an adjustment to the 2018 in service addition forecast to reflect the rescheduling of two discrete projects in 2018 as opposed to their originally forecast in service dates of 2017, the Parties accept the 2018 capital expenditures as appropriate. The Parties note that the total revenue requirement impact of these adjustments for the Test Year is \$1,154. The Parties acknowledge that CHEI retains the full discretion to manage its capital spending in the Test Year and beyond in accordance with the actual operating conditions it confronts in any particular year. CHEI's capital expenditures will be consistent with the values as set out in the Business Plan as presented in the Cost of Service application.

A summary of gross capital expenditures is presented in Table 3 below.

**Table 3 - 2018 Gross Capital Expenditures** 

	Application May 1 2017	IRR Nov 3 2017	Variance over Original Filing	Settlement Proposal Dec 15 2017	Variance over IRs

Net Book	\$4,327,541	\$4,327,541	\$0.00	\$4,386,099	\$58,559
Capital Additions					
System Access	\$34,500	\$34,500	\$0.00	\$83,200	\$48,700
System Renewal	\$110,005	\$110,005	\$0.00	\$115,780	\$5,775
System Service	\$0	\$0	\$0.00	\$0	\$0
General Plant	\$5,700	\$5,700	\$0.00	\$5,700	\$0
Total Expenditures	\$150,205	\$150,205	\$0.00	\$204,680	\$54,475
2018 Capital Contribution included in System Access	-\$5,200	-\$5,200	\$0.00	-\$132,000	-\$126,800

For the purposes of settlement of all the issues in this proceeding, the Parties accept the evidence of CHEI that the level of planned capital expenditures and the rationale for planning and pacing choices are appropriate in order to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system.

# **Parties Taking No Position**

# 1.2 Is the investment in 2017 for the new Substation of approximately \$1.5 million prudent?

#### **Full Settlement**

CHEI constructed a new 44kV substation beside the existing 44kV substation to provide redundancy for its existing distribution system and to meet the forecasted load growth. CHEI has one municipal station and has relied on Hydro One as a back-up supply for contingencies. On October 17, 2016 Hydro One notified CHEI that it is terminating the back-up supply due to one of the stations reaching end-of-life. This left CHEI with only a single station without any redundancy. CHEI also hired Stantec to complete a load and voltage study for the station and the results showed that CHEI's substation could be overloaded as early as 2016. This load increase is due to the subdivision development in the area.

Stantec also prepared performance specifications and drawings for tendering to a group of qualified substation contractors selected based on their previous experience with high voltage electrical work and/or substations. Drawings, specifications, supplementary information, instructions and bid forms were sent to the invited contractors by email and contractors were invited to attend a non-mandatory site visit to the substation. Bid submissions were reviewed by the Embrun Hydro board with Stantec, technically and financially, and the project was awarded to the winning proponent, K-Line Maintenance & Construction. The 44kV substation was built on budget and put in service on 12 of December 2017.

Taking into consideration that CHEI only has one substation with no backup supply and the forecasted subdivision growth, the Parties accept CHEI's evidence that the investment in 2017 for the new Substation of approximately \$1.5 million was prudent.

#### 1.3 OM&A

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to?

- Customer feedback and preferences;
- Productivity;
- Reliability and service quality;
- Impact on distribution rates;
- · Trade-offs with capital spending;
- · Government-mandated obligations; and
- The objectives of the Applicant and its customers.

#### **Full Settlement**

Subject to a reduction of \$40,000 to the proposed 2018 OM&A budget, the parties agree that the proposed OMA budget is appropriate. For illustrative purposes CHEI has allocated the \$40,000 reduction across the categories of OM&A spending, but the Parties acknowledge that CHEI is at liberty to manage the reduction as it sees fit, given the actual cost pressures faced by the company. CHEI does not believe that the proposed reduction will materially impact the service quality or reliability of its distribution system.

# 2 REVENUE REQUIREMENT

# 2.1 Are all elements of the Revenue Requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

#### **Full Settlement**

The parties agree that the methodology used by CHEI to calculate the Revenue Requirement is appropriate.

A summary of the adjusted Revenue Requirement reflecting adjustments and settled issues in accordance with the above is presented in Table 5 below.

Table 5 - 2018 Revenue Requirement

	Application May 1 2017	IRR Nov 3 2017	Variance over Original Filing	Settlement Proposal Dec 22 2017	Variance over IRs
OM&A Expenses	\$721,971	\$721,971	\$0	\$681,971	-\$40,000
Amortization/Depreciation	\$165,121	\$165,121	\$0	\$162,155	-\$2,966
Property Taxes	\$0	\$0	\$0	\$0	\$0
Capital Taxes	\$0	\$0	\$0	\$0	\$0
Income Taxes (Grossed up)	\$4,631	\$4,623	-\$8	\$4,076	-\$546
Other Expenses	\$0	\$0	\$0	\$0	\$0
Return					
Deemed Interest Expense	\$79,719	\$79,681	-\$37	\$80,297	\$616
Return on Deemed Equity	\$165,233	\$165,157	-\$77	\$168,495	\$3,338
Service Revenue Requirement (before Revenues)	\$1,136,675	\$1,136,553	-\$122	\$1,096,994	-\$39,559
Revenue Offsets	\$29,789	\$29,658	-\$131	\$29,658	\$0
Base Revenue Requirement	\$1,106,886	\$1,106,895	\$9	\$1,067,336	-\$39,559
Gross Revenue Deficiency	\$198,507	\$210,224	\$11,717	\$191,647	\$18,577

An updated Revenue Requirement Work Form Model has been filed though the OEB's e-filing service.

#### 2.1.2 Rate Base

#### **Full Settlement**

The Parties accept the evidence of CHEI that the rate base calculations, after making the adjustment to the working capital and the in-service additions for 2018 as detailed in this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices. Table 7 below outlines CHEI's Rate Base calculation.

Table 7 - 2018 Rate Base

Particulars	Application May 1 2017	IRR Nov 3 2017	Variance over Original Filing	Settlement Proposal Dec 22 2017	Variance over IRs
				<b>*</b>

# 3 LOAD FORECAST, COST ALLOCATION AND RATE DESIGN

3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of Cooperative Hydro Embrun's customers?

#### **Full Settlement**

The Parties accept the evidence of CHEI that its methodology used for the load forecast, customer forecast, loss factors and CDM adjustments, subject to the following adjustments, is appropriate:

 the removal of the CDM adjustment related to 2015 CDM, Update 2017 and 2018 to use savings from CDM plan 2015-2020. Update allocation of manual adjustment for Load Forecast to use verified results for 2016 and the CDM Plan for 2017-2018

The resulting billing determinants are presented in Table 12 below.

Table 12 - 2018 Test Year Billing Determinants (for Cost Allocation and Rate Design)

#### **Parties Taking No Position**

#### 3.1.2 Load Forecast

#### **Full Settlement**

The Parties agreed to the following updates in the Load Forecast Model:

- the removal of the CDM weighting factor related to 2015 CDM,
- For the 2015-2020 CDM Program Table, CHEI used the 2016 verified results persisting in 2018 along with annual savings from the CDM plan for 2017 and 2018 assuming a 100% persistence for 2018.
- A revised allocation of the manual CDM adjustment based on the 2016 verified results and the CDM plan savings for 2017 and 2018.

Table 14 below provides the weather normalized billed kWh and billed demand forecast by rate class.

# 3.1.3 Loss Factors

#### **Full Settlement**

The Parties agree to the Loss Factors as corrected through the interrogatory process and as summarized in Table15 below. The Parties further accept that, in view of CHEI's current line loss figures, CHEI will continue to pursue recommendations presented to it in its most recent Line Loss Study through 2018, and to initiate a new line loss study in 2019 to, in part, review the impact of those recommendations once implemented.

# 3.2 Is the proposed cost allocation methodology, and are the allocations and revenue-to-cost ratios, appropriate?

#### **Full Settlement**

The Parties agree to the following adjustments:

Correction of formula in demand data calculations.

Subject to the above adjustments, the Parties accept the evidence of CHEI that all elements of the cost allocation methodology allocation and Revenue-to-Cost ratios have been correctly determined in accordance with OEB policies and practices. CHEI proposes to move the revenue to cost ratios for the General Service > 50 to 4999 kW class to the ceiling of 1.20 in its 2019 rate application. The proposed allocation and revenue reallocation for 2019 is shown at table 18 below.

Table 17 - Summary of 2018 Revenue to Cost Ratios

### **Parties Taking No Position**

### 3.3.1 Residential Rate Design

#### **Full Settlement**

The Parties accept that CHEI's proposal for the phase-in of a fully fixed charge for the residential rate class remains appropriate and is properly reflected in the application. The Parties accept CHEI's proposal to extend the phase-in of a fully fixed charge for the residential rate class by two additional years in order to mitigate the impact of the transition. Accordingly, CHEI's residential rates will transition to a fully fixed charge beginning in 2021. The parties agree that increasing the transition to the fixed rate design over a six-year transition period is necessary in order to mitigate the impact on low volume consumers. Those bill impacts would have been over 11%. Extending the transition by two additional years for a total of six years brings the bill impact to 10.4%.

# 3.4 Are the proposed Retail Transmission Service Rates and Low Voltage Service Rates appropriate?

#### **Full Settlement**

The Parties accept the evidence of CHEI that all elements of the Retail Transmission Service Rates ("RTSRs") and Low Voltage Service Rates have been correctly determined in accordance with OEB policies and practices.

#### **Evidence References**

#### 4 ACCOUNTING

4.1 Have all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

#### **Full Settlement**

The Parties accept the evidence of CHEI that all impacts of changes to accounting standards, policies, estimates, and adjustments have been properly identified and recorded in accordance with the OEB's policies and properly reflected in rates.

An updated EDDVAR Continuity Schedule is provided in working Excel format reflecting this Settlement Proposal and includes the calculation of the various riders discussed above.

4.2 Are Cooperative Hydro Embrun's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts and the continuation of existing accounts, appropriate?

#### **Full Settlement**

The Parties accept the evidence of CHEI that all elements of the applied for deferral and variance accounts are appropriate as updated through the interrogatory process, including the balances in the existing accounts and their disposition on a harmonized basis commencing January 1, 2018 and the continuation of existing accounts. Specific to the clearance of the 2015 and 2016 LRAMVA balance, the parties accept the updated balances as appropriate for clearance.

The Parties accept CHEI's proposal to dispose of all deferral and variances balances including LRAMVA balances, over a period of three years in order to mitigate the impact rate impacts. The parties agree that a longer disposal period is necessary in order to mitigate the impacts on low volume consumers' bill, which was over 11%. The resulting bill impact for the low volume consumers is 10.4%.

Table 27 below summarizes the amounts for disposition and associated rate riders by rate class.

### Notes:

# General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is **7.5%** (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

### **Load Forecast Summary**

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

#### Stage in Process:

## Per Board Decision

Customer Class

17 530	82,356 207,000	605		
2,828	29,891,982	13,376		

Notes:

Total

Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

#### **Cost Allocation and Rate Design**

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Per Board Decision

#### A) Allocated Costs

Name of Customer Class (3)		Allocated from ous Study <sup>(1)</sup>	%		located Class nue Requirement	%		
From Sheet 10. Load Forecast					(1) (7A)			
Residential General Service < 50 kW General Service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other	\$ \$ \$ \$	687,249 107,690 69,528 5,498 18,461	77.36% 12.12% 7.83% 0.62% 2.08%	\$ \$ \$ \$	892,262 114,604 58,565 4,749 26,813	81.34% 10.45% 5.34% 0.43% 2.44%		
Total	\$	888,426	100.00%	\$	1,096,994	100.00%		
				\$	1,096,994.35			

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

#### B) Calculated Class Revenues

Name of Customer Class		Forecast (LF) X ent approved rates				( Proposed Rates	Miscellaneous Revenues		
		(7B)		(7C)		(7D)		(7E)	
Residential General Service < 50 kW General Service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other  number of the service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other	\$ \$ \$ \$ \$	869,597 108,608 58,065 4,642 26,424	\$ \$ \$ \$ \$	836,239 123,047 81,487 5,772 20,792	* * * *	839,227 123,109 75,673 5,613 23,713	\$ \$ \$ \$ \$	22,698 5,970 462 109 419	
7   8   9   20   <b>Total</b>	<b>= =</b> \$	1,067,336	\$	1,067,336	\$	1,067,336	\$	29,658	

<sup>(4)</sup> In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

<sup>(5)</sup> Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

<sup>(6)</sup> Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

<sup>(7)</sup> Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

#### C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2014			
	%	%	%	%
1 Residential	107.00%	96.27%	96.60%	85 - 115
2 General Service < 50 kW	88.00%	112.58%	112.63%	85 - 115
3 General Service > 50 to 4999 kW	103.00%	139.93%	130.00%	80 - 120
4 Unmetered Scattered Load	70.00%	123.82%	120.49%	80 - 120
5 Street Lighting	70.00%	79.11%	90.00%	80 - 120
6 other				80 - 120
7 other				80 - 120
8				
9				
10				
11				
2				
13				
4				
5				
16				
17				
8				
19				
20				

<sup>(8)</sup> Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

<sup>(9)</sup> Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

<sup>(10)</sup> Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

# (D) Proposed Revenue-to-Cost Ratios (11)

Name of Customer Class	Propos	Proposed Revenue-to-Cost Ratio									
	Test Year	Price Cap IR F		Policy Range							
	2018	2019	2020								
Residential	96.60%	96.60%	96.60%	85 - 115							
General Service < 50 kW	112.63%	112.63%	112.63%	85 - 115							
General Service > 50 to 4999 kW	130.00%	130.00%	130.00%	80 - 120							
Unmetered Scattered Load	120.49%	120.49%	120.49%	80 - 120							
Street Lighting	90.00%	90.00%	90.00%	80 - 120							
other				80 - 120							
other				80 - 120

<b>;</b>											
<b>!</b>											
7											
3											

<sup>(11)</sup> The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2017 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2018 and 2019 Price Cap IR models, as necessary. For 2018 and 2019, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2017 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Notes:

# Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluemtric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

<sup>1</sup> Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

### **Tracking Form**

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

Cooperative Hydro Embrun Inc. EB-2017-0035 Settlement Proposal Page 55 of 57 Filed: December 22, 2017

# C. Bill Impacts

# Tariff Schedule and Bill Impacts Model (2018 Cost of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. The OEB has established that, when assessing the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, a utility shall evaluate the total bill impact for a low volume residential customer consuming at the distributor's 10th consumption percentile19, to a minimum of 50 kWh per month. Refer to page 62 of Chapter 2 Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

#### Note

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact chart for the specific class.
- 2. Due to the change to energy consumption used in the calculation of GA rate riders for the 2017 rate year, the separate "GA Rate Riders" line is only applicable to the "Proposed" section of the bill impact tables.
- 3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

#### Table '

### RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/ documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Service Charge (per customer)	\$	21.16
